EDUCATION

- Veermata Jijabai Technological Institute (VJTI)** 2024
B.Tech in Production Engineering CGPA : 7.87
- S.V.P Junior College of Science** 2019
HSC, Maharashtra Percentage : 77.85
- St.Rocks High School** 2017
SSC, Maharashtra Percentage : 85.20

EXPERIENCE

- Bynarc Services Pvt Ltd.** 08/2026 - Present
Full Stack Developer Mumbai
 - Developing and maintaining scalable Web applications using the **React.js, Node.js, Next.js, Laravel, MySQL, PostgreSQL, Redis, AWS, and Apache.**
 - Designed and implemented secure, scalable RESTful APIs, improving backend performance and reducing API response time through query optimization and efficient caching strategies.
 - Built responsive and SEO-friendly user interfaces with React.js and Next.js, ensuring high performance and an enhanced user experience across devices.
 - Integrated Next.js as an independent microservice within the application architecture, enabling better scalability, maintainability, and faster page rendering.
 - Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, daily stand-ups, code reviews, and release planning to deliver features on schedule.
 - Debugged production issues, optimized database queries, and maintained comprehensive technical documentation to ensure application stability and long-term maintainability.
- GRG India** 07/2024 - 06/2026
Software Developer Mumbai
 - Developing and maintaining scalable SAAS-based software solutions using modern frameworks and technologies such as ReactJS, Javascript, Laravel, CI4, MySQL, MongoDB, Redis, NOSQL, AWS, Apache server.
 - Implemented RESTful APIs and optimized backend services, resulting in faster response times and improved user experience.
 - Contributed to code reviews, debugging, and documentation to ensure high-quality and maintainable codebase.
 - Worked in an development environment, participating in sprint planning and daily stand-ups to meet project goals.
 - Implemented Advance Laravel Libraries and Amazon Simple Queue Service (SQS) in the Projects.

INTERNSHIPS

- Godrej and Boyce** 07/2023 - 01/2024
Intern Mumbai
 - Performed CNC machine daily data analysis using Advanced Excel, PowerBI, Tableau
 - Project:** Designed a new Hydraulic Fixture using AutoCAD and SolidWorks.
- Exposys Data Labs** 01/2023 - 03/2023
Intern Bangalore
 - Learned about Cyber Security, encryption, and system protection mechanisms.
 - Project:** Built a custom TDES (Triple Data Encryption Standard) for securing confidential data.
- Coincent.ai** 10/2022 - 12/2022
Intern Bangalore
 - Studied and created Data Science projects using Python.
 - Project:** Created a ChatBot for Hotel FAQs using Python and NLP techniques.

TECHNICAL SKILLS

Languages: Python3, R, Java, SQL, NOSQL, HTML, CSS, JavaScript, PHP, Matlab.
Developer Tools: VsCode, Jupyter Notebook, GitHub, Eclipse, Nodejs, Cloudwatch(AWS), Gitlab, Antigravity.
Frameworks/Technologies: Laravel, ReactJS, Django, MERN, CI4, NextJS.
Cloud/Databases: MYSQL, MongoDB, SQLite, PostgreSQL, Dynamodb, AWS.

PERSONAL PROJECTS

• RewardHub Management System

11/2025

Full Stack Developer | GRG India

- **Tools & technologies used :** React.js, Laravel 8+, PHP, JavaScript, Python, AWS, SQS, GitHub Copilot, VS Code.
- Developed and maintained a scalable rewards management platform for enterprise clients using React.js and Laravel, delivering both frontend and backend features. Designed and implemented new modules from scratch based on client requirements while maintaining existing functionalities and improving application performance. Integrated multiple third-party REST APIs for reward processing, user management, and business workflows with proper authentication and error handling. Worked closely with cross-functional teams during requirement analysis, development, testing, deployment, and production support following Agile methodologies. Optimized SQL queries, fixed production issues, performed debugging, and ensured successful deployments after QA validation. Managed source code using Git and participated in code reviews to maintain coding standards and application quality.

• Incentive Management System

07/2024

Full Stack Developer | GRG India

- **Tools & technologies used :** PHP, Laravel, CI4, JavaScript, Python, AWS, GitHub Copilot, Git, VS Code.
- Developed an enterprise web application to automate incentive and reward management processes for multiple business clients. Implemented backend APIs and frontend modules to manage incentive calculations, employee data, reporting, and approval workflows. Integrated third-party APIs to synchronize business data and automate client-specific operations. Developed new features from scratch, resolved production issues, and enhanced existing modules based on evolving client requirements. Collaborated with QA and business teams to ensure successful testing, production deployments, and timely delivery of releases. Maintained application performance, optimized database queries, and ensured system reliability in production environments.

• File Sharing APP(File transferring web application)

01/2024

It was a Personal Project in which I have created a "File transferring web application" with MongoDB

- **Tools & technologies used :** Vscod, Mongodb, MongoAtlas and some front-end tools like:HTML, CSS, javascript
- Get to learn about the Mongodb and Node.js in precise way and how to expand the script to delete files older than 24 hours from the storage database to add more amazing features
- The application has a few administrators and will provide access to large files that can be shared with specific permissions. If you Upload relevant documents in MongoDB via Mongoose GridFS, a feature to break large data files (more than 16MB) into smaller files.
- Designed a file integrity and auto-cleanup mechanism using scheduled background jobs (cron) to validate file metadata and automatically remove expired files from MongoDB GridFS storage.

ACHIEVEMENTS & CERTIFICATIONS

- **Certification by LinkedIn and Microsoft** The new concepts of Web Development 07/2024
- **Internship Certification at Aerospace Department** Worked on Assigned project 01/2024
- **Internship Certification in Cyber Security** Concepts of Cryptography and Encryption Methods 03/2023
- **Microsoft Azure AI Fundamentals Exam** The new Concepts of SAAS and AI Fundamentals 12/2022
- **Internship Certification in Data Science** Algorithm use in Data Science Using Python Language 12/2022
- **Python Learning Certificate** Concepts of Python in Data Science and Machine Learning 10/2022
- **Advance Java Learning Certificate** The new Concepts of java in Web Development 07/2022
